

the 1990s, the number of people in the UK who are aged 65 and over has increased from 10.5 million to 13.5 million, and the number of people aged 75 and over has increased from 4.5 million to 6.5 million (Office for National Statistics 2000). The number of people aged 65 and over is projected to increase to 16.5 million by 2020, and the number of people aged 75 and over to 8.5 million (Office for National Statistics 2000). The increase in the number of people aged 65 and over is due to a combination of factors, including a decline in the birth rate, a decline in the death rate, and a decline in the rate of immigration.

The increase in the number of people aged 65 and over has led to a corresponding increase in the number of people who are dependent on others for their care. In 1990, there were 1.5 million people aged 65 and over who were dependent on others for their care, and this number is projected to increase to 2.5 million by 2020 (Office for National Statistics 2000). The increase in the number of people who are dependent on others for their care is due to a combination of factors, including a decline in the birth rate, a decline in the death rate, and a decline in the rate of immigration.

The increase in the number of people who are dependent on others for their care has led to a corresponding increase in the number of people who are living in care homes. In 1990, there were 1.5 million people aged 65 and over who were living in care homes, and this number is projected to increase to 2.5 million by 2020 (Office for National Statistics 2000). The increase in the number of people who are living in care homes is due to a combination of factors, including a decline in the birth rate, a decline in the death rate, and a decline in the rate of immigration.
