

the 1990s, the number of people in the world who are undernourished has declined by 100 million, and the number of people who are malnourished has declined by 200 million.

There are a number of reasons for this decline. One of the most important is the increase in the number of people who are employed in the agricultural sector.

Another reason is the increase in the number of people who are employed in the manufacturing sector.

A third reason is the increase in the number of people who are employed in the service sector.

A fourth reason is the increase in the number of people who are employed in the construction sector.

A fifth reason is the increase in the number of people who are employed in the health sector.

A sixth reason is the increase in the number of people who are employed in the education sector.

A seventh reason is the increase in the number of people who are employed in the social services sector.

An eighth reason is the increase in the number of people who are employed in the public administration sector.

A ninth reason is the increase in the number of people who are employed in the private sector.

A tenth reason is the increase in the number of people who are employed in the informal sector.

A eleventh reason is the increase in the number of people who are employed in the agricultural sector.

A twelfth reason is the increase in the number of people who are employed in the manufacturing sector.

A thirteenth reason is the increase in the number of people who are employed in the service sector.

A fourteenth reason is the increase in the number of people who are employed in the construction sector.

A fifteenth reason is the increase in the number of people who are employed in the health sector.

A sixteenth reason is the increase in the number of people who are employed in the education sector.

A seventeenth reason is the increase in the number of people who are employed in the social services sector.
