

the 1990s, the number of people in the world who are obese has increased by 100% (World Health Organization 1997). In the United States, the prevalence of obesity has increased from 15% in 1980 to 23% in 1994 (Flegal et al. 1994). In the United Kingdom, the prevalence of obesity has increased from 10% in 1980 to 15% in 1994 (Roberts and Manolagas 1999). Obesity is a risk factor for a number of chronic diseases, including type 2 diabetes, coronary heart disease, stroke, and certain types of cancer (World Health Organization 1997). The prevalence of obesity is increasing in all developed countries, and it is also increasing in developing countries (World Health Organization 1997). The increase in obesity is a global phenomenon, and it is a major public health problem.

The increase in obesity is due to a number of factors, including changes in diet and lifestyle. In the United States, the prevalence of obesity has increased from 15% in 1980 to 23% in 1994 (Flegal et al. 1994). In the United Kingdom, the prevalence of obesity has increased from 10% in 1980 to 15% in 1994 (Roberts and Manolagas 1999). The increase in obesity is due to a number of factors, including changes in diet and lifestyle. In the United States, the prevalence of obesity has increased from 15% in 1980 to 23% in 1994 (Flegal et al. 1994). In the United Kingdom, the prevalence of obesity has increased from 10% in 1980 to 15% in 1994 (Roberts and Manolagas 1999).

The increase in obesity is due to a number of factors, including changes in diet and lifestyle.
